Industrial Marking Inks

Standard And Special Formulations For Any Surface

Hot or cold workpiece, dry or oily surface, permanent or removable mark...whatever the marking conditions and requirements, Dell inks do the job. Inks are formulated for all types of marking applications including: manual marking, batch dipping and tumbling. A wide selection of colors is available. Any OSHA or industry requirements can be met.

Pigmented – Visible on almost any material, including dark part surfaces. Can be formulated to mark through, and/or be resistant to oil, grease, water, acidic or alkaline solutions.

Non-Pigmented – Gives you minimal film thickness. Excellent visibility on bright surfaces can be attained. Will not settle or separate. Standard colors are: yellow, red, green, blue, and white. Dell provides complete marking system design and build services and formulates workplace safe, low VOC pigmented and non-pigmented inks.

Disposable Touch Markers

*"If you can make it –
Dell can mark it."*
